

# MDM76 Quality and Patient Safety

## Overview

Following Lord Darzi's review of the NHS, there is an increased emphasis on quality and care. World-Class Commissioning also emphasises the quality agenda. This popular module, open to all health and social care professionals and managers, is therefore of particular relevance at this time.

Students may apply to take the module as part of Continuing Professional Development without necessarily taking the assessment, but successful completion of the assignment will lead to 20 M level credits. Applicants will normally be working in health services, and the content is especially relevant to the NHS.

### Module Leader

Dr Jim Price, Programme Leader for Professional Development and Senior Lecturer in Primary Care.

### Time and Place

24-28 May 2010  
University of Brighton's Falmer Campus

## Content

- Context of the quality agenda in health and social care
- Multiple perspectives of quality
- Quality metrics and analytics
- Principles of clinical and integrated governance
- Learning from both national and local enquiries
- User and public involvement in quality issues
- Communication, leadership and management
