

# Multiprofessional Fellowship Programme

The new Multiprofessional Fellowship Programme is supported by Kent, Surrey and Sussex (KSS) together with Simulation-Based Education and Technology-Enhanced Learning (SIM-TEL), South East, NHS Education England & managed by BSMS.

This regional approach to multiprofessional learning will support fellows from a range of clinical backgrounds including doctors, nurses and allied health care professionals. The aim is to work in system facing teams to bring about service improvement and establish collaborative networks in five key priority topic areas.

1. Developing Clinical Practice
2. Differential Attainment
3. Simulation-Based Education and Technology-Enhanced Learning
4. Digital Skills in Healthcare Practice
5. Leadership Development.

## Key features of the programme

This programme is a collaboration between NHS England South East/KSS together with SIM-TEL, South East, participating trusts and BSMS to include the following:

- Open to doctors who have completed foundation training, doctors at ST3 level and their equivalent or healthcare professionals band 6-8a
- c.40% protected (non-clinical) time to complete Multiprofessional Fellowship Programme
- Employed in the NHS or local authorities
- Flexible start dates throughout the academic year.

## Opportunities for the Multiprofessional Fellow

- Bespoke education: PGCert in Clinical Professional Studies; or PGCert in Healthcare Leadership and Commissioning; or PG Cert Simulation in Clinical Practice; or specific stand-alone modules
- Learning communities with other fellows – support through reflective action learning groups to develop skills needed for analytical dialogue and collaboration
- Project-based learning through active investigation of real-workplace challenges and problems to deliver developments in one or more of the five key topic areas.

### South East/KSS NHS England funding available in 2024-2025

HEE KSS and SIM-TEL, South East, HEE is investing in the Multiprofessional Fellowship Programme infrastructure and academic costs including PGCert or stand-alone module
