

Research Skills Workshops

Systematic reviews

This workshop describes the theory and conduct of systematic reviews. It will include designing your search strategy; PRISMA diagrams; filtering results; quality assessment of studies; data extraction and presentation; heterogeneity; meta-analysis. By the end of the workshop, you should be able to plan and conduct your own systematic review.

Date 6 Dec 2019
6 Feb 2020

Time 10 - 4.30pm

Interview skills

This workshop aims to help you develop skills in interviewing for quantitative and qualitative data collection. Using practical examples, participants can role-play different aspects of interviews, gaining experience of interview techniques and handling difficult situations in a safe environment.

Date 19 Jun 2019
6 Nov 2019
10 Jun 2020

Time 9.30 - 1pm

Focus groups

This workshop introduces participants to the theory and practice of using focus groups as a tool for the collection of qualitative data. Participants can practice both running and participating in focus groups. It covers issues such as the mix of participants; setting ground rules; icebreakers; working with a co-facilitator; handling difficult situations; managing recordings.

Date 19 Jun 2019
6 Nov 2019
10 Jun 2020

Time 1.45 - 5pm

Analysing qualitative data

This interactive workshop introduces a range of qualitative data types (including visual data) and some basic principles involved in their presentation and analysis. It will also introduce some of the issues involved in CAQDAS (Computer-aided qualitative data analysis and software).

Date 6 June 2019
14 Nov 2019
19 Mar 2020

Time 10.30 - 3pm

Booking

CPD participants should email cpd@bsms.ac.uk for booking details

Fee £50/workshop
(payable by credit/debit card)
