Welcome

We are delighted that you are considering postgraduate study at Brighton and Sussex Medical School (BSMS), whether as the next step in your own career or to develop your staff and trainees.

BSMS is one of the most highly regarded medical schools in the UK. As a partnership between the Universities of Brighton and Sussex and the NHS, we pride ourselves on providing high-quality clinical and professional healthcare training in a nurturing learning environment.

Over the last year we have worked closely with our colleagues in the region to expand the scope of our postgraduate offering and have added several areas of study, including Clinical Professional Studies, Internal Medicine and Surgical Studies.

Visit bsms.ac.uk/postgraduate for more details.

Our aim is to enable you to deliver high-quality healthcare – be it regionally, nationally or globally. We look forward to meeting your professional development needs. Studying in another country is an exciting prospect with many new experiences awaiting you; Brighton and Sussex Medical School is a diverse international community, which will enrich your learning experiences. We hope you enjoy your time studying here.

The Universities of Brighton and Sussex are immensely proud of the success of our medical school. BSMS has developed a strong and diverse portfolio of postgraduate courses, informed by our high-quality research, relevant to the workplace and multidisciplinary in nature.

Our graduates are gaining significantly from this experience and are increasingly well prepared to meet the challenges of an evolving healthcare sector. We are committed to high academic and professional standards, as well as to meeting the needs of students as individuals. We welcome you in considering BSMS.

Professor Malcolm Reed
Dean, BSMS

Professor Debra Humphris
Vice-Chancellor, University of Brighton

Professor Gordon Ferns
Head of the Department of Medical Education, BSMS

Professor Adam Tickell

## What BSMS postgraduate courses offer

Enabling better healthcare – regionally, nationally and globally

<table>
<thead>
<tr>
<th>Clinical and professional combined</th>
<th>Strong multidisciplinary learning</th>
<th>Nationally and globally relevant</th>
</tr>
</thead>
<tbody>
<tr>
<td>All our clinical courses include professional modules as standard, ensuring that students develop the skills and knowledge to meet the challenges of changing health and social care.</td>
<td>Our courses bring together a vibrant mix of professionals from a variety of health and social care backgrounds. As a result, students gain valuable insights into other disciplines, leading to stronger team working – and, ultimately, to better patient care.</td>
<td>Our courses are delivered by high-level practitioners, who base their teaching on the latest research and case studies. Prominent guest lecturers add to the student experience. This ensures the knowledge is relevant and translatable to both national and international healthcare settings.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Academic support</th>
<th>Benefit of two universities and local NHS trusts</th>
<th>Conveniently located with excellent transport links</th>
</tr>
</thead>
<tbody>
<tr>
<td>To help you develop and understand the different aspects of studying in the UK, key sessions in academic practice, writing assignments and developing and carrying out a research proposal for your dissertation are organised for all international students.</td>
<td>BSMS is a partnership between the Universities of Brighton and Sussex with local NHS providers and all courses are validated by both universities. Each has a strong reputation in medical and healthcare teaching and research. Some clinical courses also take place in NHS trusts which work closely with both universities.</td>
<td>BSMS is just over an hour from London, and 45 minutes from Gatwick Airport. Most courses are delivered at the main campus at Falmer or at nearby NHS centres. The vibrant city and seafront of Brighton are just four miles away.</td>
</tr>
</tbody>
</table>
The vibrant seaside city of Brighton and Hove offers an impressive array of restaurants, bars, specialist shops, museums, galleries and other attractions.

Brighton and Sussex Medical School (BSMS) is located across two university campuses at Falmer, four miles north of Brighton. Most postgraduate teaching takes place on the University of Brighton Falmer campus.

Falmer is very well served by public transport, with regular rail and bus services running directly into both campuses, and is easily accessed by road. The village of Falmer is located on the edge of the South Downs National Park, with beautiful countryside just minutes away.

BSMS is run in partnership by the Universities of Brighton and Sussex, and all postgraduate degrees lead to joint awards. Our students are full members of both universities and are entitled to make use of the facilities each institution has to offer.
Support and facilities

Campus facilities
There are a number of catering outlets on both campuses, from small café bars to self-service restaurants. The Students’ Union runs a shop and café on the Brighton campus during term time. A number of facilities are available on the Sussex campus including a bank, post office, supermarket and pharmacy.

Student Services
Student Services provide a range of support to students throughout their courses to help ensure they get the most out of their experience. They offer professional support and advice on career development, finance and welfare, along with counselling services.

Learning resources and libraries
BSMS students have access to the full range of learning resources at the University of Brighton, the University of Sussex, and Brighton and Sussex University Hospitals NHS Trust. Resources include libraries, media centres and computer rooms.

The University of Brighton has libraries in Falmer, Brighton, Eastbourne and Hastings. The University of Sussex Library is located on the Sussex campus. Both universities offer online library services.

Sport
As members of both universities, BSMS students can use the sporting facilities offered by the University of Brighton and the University of Sussex. Sports facilities across both campuses include sports halls, fitness rooms, dance classes and studios, squash and tennis courts, and football, rugby and floodlit astroturf pitches.

Childcare
Both universities offer nurseries and students may enquire and apply for a nursery place once an offer from the university has been accepted.

Disability and dyslexia
BSMS believes that every student should have an equal opportunity to acquire knowledge and prove their ability. The Disability and Dyslexia team at the University of Brighton is on hand to discuss the specific needs of students and reasonable adjustments can be made to teaching and learning delivery. The team is able to offer advice on all aspects of studying with a disability or dyslexia.

For more detailed information on the support and facilities offered please visit the following websites:

University of Brighton: brighton.ac.uk
University of Sussex: sussex.ac.uk
Exceptional education

At BSMS we place the quality of the student’s learning experience at the heart of all our activities, in an environment which is intellectually challenging and enjoyable for a diverse body of students and staff.

We deliver an exciting, relevant, balanced and well-taught range of postgraduate courses which emphasise the importance of research, both to inform teaching and also as a key skill for students.

Subject leadership is offered by professionals of the highest academic calibre, supported by a wide selection of high-quality speakers who are leading experts in their fields. BSMS is characterised by outstanding personal support for students and a commitment to listen and respond positively to student feedback.

Ensuring equality and diversity

At BSMS we are committed to a value-based curriculum, both inside and outside the classroom. We believe that all people involved with our school should feel welcome and respected, and be valued for the positive contributions they can make.

The school has a commitment to equality and diversity, including protected characteristics such as sex, race, disability, religion and belief, age, gender reassignment, pregnancy and maternity, marriage and civil partnership and sexual orientation.

BSMS strives to provide a higher education environment that is intellectually challenging and enjoyable for a diverse body of students and staff, underpinned by a culture of mutual respect.

We believe that, as a result, we are helping equip students to provide best medical practice.
BSMS offers a range of full-time (one year) taught postgraduate courses to international students up to Masters level in subjects relevant to medicine and healthcare and the delivery of the national curriculum framework for specialist training.

Courses are modular and lead to the following awards:

- **Masters**
  Successful completion of a minimum of four to six taught modules plus a dissertation

- **Postgraduate Diploma**
  Successful completion of four to six taught modules

- **Postgraduate Certificate**
  Successful completion of three taught modules.

Unless otherwise stated on the relevant course page of our website, successful completion of a module is awarded 20 Masters level credits and requires 200 hours of student input, mainly through independent study. Every module has its own method of presentation and assessment.

**Mode of study**

Modules are taught either extensively over a semester or intensively in blocks of two to five days (see relevant course web page).

**Dissertation**

All Masters courses include a research-based dissertation on a relevant topic of interest, which students are encouraged to publish. Students are supported by a dissertation supervisor and by an extensive programme of research skills workshops that include: interview skills, analysing qualitative data, statistical analysis, and sampling and sample size.

International student programme

BSMS provides a range of benefits for international students, including preparation in language and study skills and dedicated support from tutorial staff.

International students study full time courses over a one-year period. Courses may be taken on a part-time basis, subject to visa requirements.

For further information and details of courses please visit:

bsms.ac.uk/postgraduate/international

International students are invited to attend an induction day, where they can meet and talk together with their academic co-ordinator and other key members of staff. It is a great opportunity to bring up any questions and begin to plan work over the coming term. The day also includes a presentation on the organisation and management of the National Health Service (NHS) in the UK. Most of the lecturers work in the NHS and it is important to understand how the system is structured and run, as examples and good practice will often be based in this organisation.

The international student programme at BSMS offers excellent support including:

- preparation in language and study skills
- an introduction to healthcare and life in the UK
- dedicated support services and a member of staff as a first contact point
- a personalised learning experience, with small group seminars and workshops
- research training relevant to the needs of international students
- professional modules in leadership, communication, learning and teaching, in which a wide range of international students study together
- in-depth study at the cutting edge of clinical and health practice
- a research dissertation in an area relevant to improving healthcare in the student’s home country.

BSMS also provides a number of additional workshops throughout the year to support students with their studies. These include subjects such as:

- key regulations and academic conduct
- planning assignments
- planning and preparing a dissertation proposal and project.

“One of the best decisions I’ve made in my life was to do my Masters at BSMS. As an overseas student, I had all the care and support I needed. It was a great year, my supervisors were super and I wish I could turn back time to be there again.”

Wiaam Alaa
MSc Public Health graduate

BSMS also provides a number of additional workshops throughout the year to support students with their studies. These include subjects such as:

MSc Public Health graduate
Clinical specialties
The BSMS clinical specialties courses provide advanced professional postgraduate education.

These courses train specialists to be the high-achieving consultants and clinical leaders of the future by providing a unique blend of clinical knowledge with learning in key professional domains.

All clinical courses include a module in research methods and critical appraisal. Many courses include modules in communication, learning and teaching in health and social care, leading and transforming services, and clinical commissioning for quality care.

Each of the clinical courses will enhance the knowledge and abilities of students in a particular clinical specialty to enable them to develop successful careers.

Completing these courses will ensure that you have the skills to provide high-quality care, both directly and indirectly, through roles in education, leadership and management.
Entry requirements
The course is open to post-registration doctors and qualified practitioners in any profession allied to medicine. Those with a first degree will have a minimum of two years’ clinical practice; those without will have a minimum of five years’ post-qualification practice in cardiology. Applicants who do not hold a first degree will initially register for either a Postgraduate Certificate or a Postgraduate Diploma award.

A minimum IELTS score of 7.0 is required.
About this course
This internationally recognised course is designed to train healthcare professionals to be the clinical leaders of the future by providing a mix of clinical and professional knowledge relevant to the practice of cardiology in contemporary healthcare. Learning in key professional domains includes service leadership and development, research, commissioning and communication and teaching. The cardiology content of the course provides comprehensive learning to meet the professional development needs of a wide range of practitioners working in cardiology.

Who is it for?
The course is designed to provide advanced professional education for a wide range of practitioners with a career interest in cardiology. The course is suitable for doctors aspiring to specialist positions. It has a multi-professional focus and is also suitable for nurses, pharmacists, paramedic practitioners, radiographers and cardiac physiologists who wish to develop a specialist interest in cardiology at Masters level.

Key areas of study
• Communication, learning and teaching in health and social care
• Acute cardiology principles and practice
• Fundamentals of cardiac diagnostic procedures and investigations
• Invasive and interventional cardiology
• Research methods and critical appraisal
• Leadership and change management in clinical services
• Quality, safety and service improvement in clinical services

What are the benefits?
On completion of the course, students will have developed a broad and systematic understanding of cardiovascular medicine and will be equipped to use this knowledge toward good practice. Students will also have acquired a portfolio of advanced research, leadership, and communication and learning skills to support the development of a specialist interest in cardiology and enhance their future career opportunities.

“The Acute Cardiology module definitely had a positive effect on my practice in cardiology. It allowed me to review and discuss the main topics which I am most likely to encounter working in this field.”

Ebrahim Alskaf
MSc Cardiology student
**MSc • PGDip • PGCert**

**Course Principal**
Professor Sube Banerjee

**Course Leader**
Dr Naji Tabet

**Entry requirements**
A degree and evidence of a capacity to study at Masters level with a substantial interest and/or experience in an area of health or social care.

or:
Evidence of a capacity to study at Masters level and at least two years’ work experience in an environment related to dementia care (including lived experience).

or:
Completion of at least three years’ basic medical science at a UK medical school (having gained at least 360 credits) with a guaranteed place to continue medical studies on completion of the MSc.

A minimum IELTS score of 7.0 is required.

Further information +44 (0) 1273 641782 • enquiries@brighton.ac.uk • bsms.ac.uk/dementia-studies
About this course
Dementia is a growing problem globally. This course comprises a set of educational initiatives which enable healthcare professionals to improve the quality of life of dementia sufferers by building expertise in generating and delivering better care. The comprehensive, holistic, theoretical and practical framework for understanding dementia enables a broad understanding of the impact on the individual and society. Clinical knowledge is blended with developing skills in communication for health and social care, research and leadership learning.

Who is it for?
The course is aimed at a wide range of professionals who are in a position to deliver improvements to the health and care of people with dementia. This includes nurses, doctors, psychologists, occupational therapists and managers and staff in nursing and residential homes.

Key areas of study
- Understanding dementia
- Assessment and treatment of dementia
- Psychological and social perspectives of dementia
- Research methods and critical appraisal
- Leadership and change management in clinical services
- Quality, safety and service improvement in clinical services
- Communication and learning in health and social care

What are the benefits?
Students will be empowered to deliver significant improvements in the quality of services provided. Successful completion of the course will provide specialised knowledge and expertise which will be invaluable in improving the prospect of employment in the field and will enhance the likelihood of career progression.

“This course has enabled me to gain an up-to-date understanding of what dementia is and the latest diagnostic approaches and treatments while stretching my thinking and helping me to remember that it is real people who are facing these difficulties.”

Dr Andrew Risbridger
MSc Dementia Studies student
Internal Medicine*

MSc • PGDip • PGCert

Open to
UK • EU • International applicants

Start date
September 2018

Mode of study
Full-time: 1 year

Course Principal
Professor Kevin Davies

Course Leader
Dr Ursula Davies

Entry requirements
This course will be open to medical trainees who have completed Part I MRCP – or equivalent. Other applicants may be considered if they have an equivalent level of experience and qualification.

A minimum IELTS score of 7.0 is required.

Further information +44 (0) 1273 641782 • enquiries@brighton.ac.uk • bsms.ac.uk/internal-medicine

*Subject to validation
**About this course**

Run in partnership with educators, commissioners and practitioners from throughout the region, the course has support from Health Education Kent, Surrey, and Sussex (HEKSS). It provides a rounded education in internal medicine, including current advances in medical sciences and their application in the clinical arena. Students will gain a detailed understanding of core research methodologies, critical evaluation, evidence-based approaches and the pathophysiology of conditions of clinical interest.

**Who is it for?**

The course is designed for medical trainees interested in professional and academic development in the field of internal medicine.

**Key areas of study**

- Intensive medicine
- Auto-immunity
- Infectious diseases and HIV medicine
- Frailty and elderly medicine
- Research methods and critical appraisal
- Leadership and change management in clinical services
- Communication, learning and teaching in health and social care
- Research dissertation

**What are the benefits?**

The course provides increased scientific awareness of pathophysiological processes and will prepare medical trainees for advanced practice and senior clinical posts. It will train students to be high-achieving consultants and clinical leaders by combining clinical knowledge with professional development learning in the three key domains of leadership; communication, learning and teaching; and the development of research and publishing skills. It will also prepare students who wish to engage in substantive research projects leading to MD or PhD.

“We are delighted to provide this unique opportunity for advanced education in Internal Medicine. Our Masters course promotes in depth understanding of disease processes across a broad range of medical specialties, including their pathophysiology and latest research data. It ensures high level diagnostic skills and expert management technique for forward looking consultant physicians of the future.”

**Dr Ursula Davies**

Course Leader
Paediatrics and Child Health

MSc • PGDip • PGCert

Open to
UK • EU • International applicants

Start date
September 2018

Mode of study
Full-time: 1 year

Course Principal
Professor Somnath Mukhopadhyay

Course Leaders
Dr Christina Jones
Ms Anouk van der Avoirt

Entry requirements
Applicants should have a degree in medicine or any of the allied health professions (such as nursing, dietetics, physiotherapy, occupational therapy). Applicants should be working in Paediatrics and Child Health and/or interested in pursuing a career in this specialty.

A minimum IELTS score of 7.0 is required.
### About this course
The course provides a detailed understanding of core research methodologies, critical evaluation, evidence-based approaches and the scientific basis of childhood disease. A key feature is its multi-professional nature, which is considered essential for professional practice in paediatrics and child health. The uniqueness of this course is its emphasis not only on the clinical aspects of paediatric care but also on the provision of care which will be embedded within the clinical modules.

### Who is it for?
This multidisciplinary course is designed for all allied health professionals with a career interest in paediatrics and child health. It is suitable for Specialty Trainee doctors in paediatrics and other healthcare professionals working with children and young people.

### Key areas of study
- Acute and emergency paediatrics
- Management of long-term conditions in children
- Developmental paediatrics
- Research methods and critical appraisal
- Communication, learning and teaching in health and social care
- Leadership and change management in clinical services

### What are the benefits?
This course provides advanced expert education for professionals working in paediatrics and child health. The course will train students to be high-achieving consultants and clinical leaders of the future by blending clinical knowledge with learning in the three key multi-professional domains of leadership, communication and learning and teaching, along with the development of research and publishing skills.

“The course is empowering me to accomplish my career prospects in terms of both clinical knowledge and professional confidence. There has been a very clear structure and supportive guidance throughout and I’ve felt very inspired and positively driven by all my professors and assisting staff.”

**Elisa Camponeschi**
Physiotherapist and MSc student
Entry requirements
Applicants should have an undergraduate medical degree, and should be able to demonstrate an ability to study at this level. It is expected that students will be in clinical practice throughout the programme.

A minimum IELTS score of 7.0 is required.

Applications will also be considered from other professionals in appropriate clinical practice.
About this course

This course is designed to provide and prepare surgeons for advanced posts and practice. It is modular with six one-week teaching blocks.

The course is not designed to duplicate the preparation for the Royal College exams; instead it will cover topics not routinely covered by standard training or included in mainstream textbooks. The emphasis is on acquiring knowledge and skills which will prepare students for advanced practice in surgery.

Who is it for?

Designed for surgical trainees, the course is also suitable for other practitioners wanting a more in-depth understanding of the field of surgery and all that it encompasses.

Key areas of study

Three clinical modules:
- Advanced professional issues in surgery
- Perioperative care in surgery
- Principles and practice of simulation in surgery

Three professional modules:
- Research methods and critical appraisal
- Leadership and change management in clinical services
- Communication, learning and teaching in health and social care

Research-based dissertation

What are the benefits?

This course will support the professional who is looking to become a better-rounded surgical expert. It will marry theory with practical skills in a variety of subjects to produce a thorough learning experience. The professional modules encompass the three crucial areas of research, leadership and education to equip the surgical leaders of tomorrow with the knowledge and skills necessary for their jobs.

“We are excited about the development of this new course at BSMS. We have designed it to go beyond normal training opportunities to provide insights and learning which you can’t get from textbooks. We want to promote surgery as an advanced clinical and academic discipline within future healthcare.”

Ms Anouk van der Avoirt
Course Leader
Healthcare professionals
At BSMS we also offer courses that develop professional non-clinical skills.

They can be taken as Masters, Postgraduate Diploma or Postgraduate Certificate courses in their own right, or accessed as modules within our clinical specialties programme. Our courses contribute to our overall vision as a medical school, providing quality training for all healthcare professionals and a rounded opportunity to learn. Our classes attract participants from a range of disciplines, each bringing their own perspectives to the course, which enhances the quality of learning. Students are provided with the opportunity to hone their skills and step up to their next career move within an ever-changing, multidisciplinary and multi-sector world of healthcare.
PGCert

Open to
UK • EU • International applicants

Start date
September 2018

Mode of study
Full-time: 1 year

Course Leader
Ms Jackie Knight

Entry requirements
Entry is open to all medical trainees, physician associates, locally employed doctors, specialty associate doctors and other healthcare professionals. Students should normally have at least one year of professional practice before entering the course.

A minimum IELTS score of 7.0 is required.

Further information +44 (0) 1273 641782 • enquiries@brighton.ac.uk • bsms.ac.uk/clinical-professional-studies
This course will provide a rounded education to prepare senior specialists for advanced professional practice, taking into account their academic and professional development needs. It is part of the Clinical Specialties programme within BSMSI, and is jointly validated by the University of Brighton and the University of Sussex. Participants will study both theory and practical skills in a range of subjects that cover the three core domains of research, leadership and education.

Who is it for?
The PGCert Clinical Professional Studies is designed to meet the career development needs of healthcare professionals, in particular: medical, surgical, psychiatry and GP trainees; physician associates, locally employed doctors and speciality associate doctors.

Key areas of study
Three professional modules:
- Research methods and critical appraisal
- Leadership and change management in clinical services
- Communication, learning and teaching in health and social care

It is possible to substitute another module from the BSMS Department of Medical Education portfolio for one of the above modules.

What are the benefits?
The course will help develop the careers of medical and healthcare professionals, supporting them to become better-rounded clinical professionals. The knowledge, skills and practice they gain will enable them to be more effective senior practitioners, and prepare them to undertake greater leadership roles in the future.

“...This is the ideal qualification for those who retain a clinical focus and are committed to the improvement of patient care. Working in partnership with clinical experts, patients, health and social care providers, this exciting new programme is designed for experienced clinicians working in a clinical, education, management or research role who are keen to challenge their thinking, gain new skills and make a difference to their practice.”

Global Health

MSc • PGDip • PGCert

Open to
UK • EU • International applicants

Start date
September 2018

Mode of study
Full-time: 1 year

Course Leader
Dr Mei L Trueba

Entry requirements
A first or upper second-class undergraduate honours degree or equivalent in any global health-related subject (eg, development studies, anthropology, nursing, political sciences, geography psychology, biomedical sciences, etc) or the successful completion of at least three years’ basic medical science at a UK medical school (having gained at least 360 credits). Relevant global health experience is desirable but not essential.

A minimum IELTS score of 7.0 is required, with no less than 6.5 in each section.

Further information +44 (0) 1273 641782 • enquiries@brighton.ac.uk • bsms.ac.uk/global-health
About this course
The course brings together experts from the health sciences, pharmaceutical sciences, development studies, anthropology, economics and political sciences among others in order to deliver a stimulating and vibrant programme. Topics cover the health-poverty-development link; health inequities; cultural understandings of health and healing; global burden of disease and injury; global health management (health policy and practice); access to medicines; and the relationship between health, globalisation and global governance.

Who is it for?
The course is suitable for anyone interested in global health who would like to take an inter, multi and cross-disciplinary approach to health and ill health. It develops students’ understanding of the complex determinants of health in a globalised world and their potential solutions in order to help them contribute to the improvement of health equity and social justice worldwide.

Key areas of study
• Determinants of health and ill health in a globalised world
• Global burden of disease and injury
• Global health management
• Access to medicines
• Neglected tropical diseases (NTDS)
• Health, poverty and development
• Global health policy and practice
• Global occupational health
• Antibiotic resistance
• Emerging infectious diseases
• Research practice in global contexts

What are the benefits?
Graduates will have the skills to work as global health practitioners, policy makers, consultants or researchers within international health and development agencies. They will have a sound understanding of ever-complex global health problems, their potential management strategies at different levels and the research processes needed to foster change. Previous graduates have gone into a range of careers, including working for international non-governmental organisations, Public Health England or pursuing fully funded PhDs.

“I’d always known I wanted to work in the development or humanitarian sectors and my Masters at BSMS made it possible for me to shift my career to start working on what I really enjoy.”

Marta Fernandez-Arias

Start date
September 2018

Mode of study
Full-time: 1 year

Course Leader
Dr Sarah Marshall

Entry requirements
A first or upper second-class undergraduate honours degree in a relevant subject or equivalent.

A minimum IELTS score of 7.0 is required, with no less than 6.5 in each section.

Further information +44 (0) 1273 641782 • enquiries@brighton.ac.uk • bsms.ac.uk/global-pharmacy
About this course
The course develops students’ understanding of how pharmacy can impact global health. Students are provided with a foundation in the complex determinants of health and the global burden and management of disease. The curriculum then focuses on the twin strands of pharmaceuticals and pharmacists, and their role in improving global health, with a particular emphasis on addressing health inequities. The course brings together experts from many disciplines to deliver a vibrant and stimulating programme.

Who is it for?
The Global Pharmacy course is suitable for anyone interested in taking a multidisciplinary approach to the relationship between pharmacy and global health.

This course is particularly relevant for pharmacists, those working in the pharmaceutical industry and pharmaceutical policy makers, as well as others interested in how global health and pharmacy intersect.

Key areas of study
- Social determinants of health and ill health
- Global burden and management of disease
- Access to good quality medicines
- Affordability of medicines
- Supply chain management
- Rational use of medicines
- The role of the pharmaceutical industry in global health
- Pharmacy and global health
- Pharmacy and humanitarian responses
- Research practice in global contexts.

What are the benefits?
This course equips students to apply their specialist knowledge and skills to make a unique contribution to improving global health through pharmacy. The course has a particular focus on overcoming health inequities: the avoidable differences in health globally.

Graduates will have the skills to work as global pharmacy practitioners, policy makers, consultants or researchers, with international health and development agencies or in global health-related aspects of the pharmaceutical industry.

“This module has not only taught me a lot about the complexity and importance of access to medicines, but has given me the chance to hear from and interact with some inspirational people working in the field. It has been truly engaging and eye-opening.”

Jennifer Hockey
Access to Medicines module student
Healthcare Leadership and Commissioning

MSc • PGDip • PGCert

Open to
UK • EU • International applicants

Start date
September 2018

Mode of study
Full-time: 1 year

Course Leader
Ms Breda Flaherty

Entry requirements
Applicants will normally have clinical, managerial or leadership experience and/or be educated to degree level. Students are normally in practice in the health and social care field. Full-time students, or students not in healthcare practice, will be identified and supported through the tutorial process.

or:
Successful completion of at least three years’ basic medical science at a UK medical school (having gained at least 360 credits) with a guaranteed place to continue medical studies on completion of the MSc.

A minimum IELTS score of 7.0 is required.

Further information +44 (0) 1273 641782 • enquiries@brighton.ac.uk • bsms.ac.uk/healthcare-leadership-and-commissioning
**About this course**

With an innovative blend of leadership theory, contemporary healthcare policy and active application to practice, we equip clinicians, leaders, commissioners and managers to develop their knowledge and understanding of healthcare leadership. Uniquely, we focus on clinical expertise and clinical contexts in depth, alongside research and implementing change in practice.

**Who is it for?**

Our multidisciplinary approach brings clinicians, leaders, commissioners and managers together from all parts of the health and care system, offering a rich learning environment to build links with colleagues from other professions and services.

**Key areas of study**

- Leadership and change management in clinical services
- Commissioning for quality care
- Quality, safety and service improvement in clinical services
- Principles and practice of public health
- Research methods and critical appraisal
- Economics of health and health-related behaviour

**What are the benefits?**

We have been offering in-depth academic study of healthcare leadership and commissioning at BSMS over the past 10 years. Our graduates will apply their range of specialist skills to real healthcare challenges. They will conduct research and enquiry into challenges to the dominant 20th century models of healthcare and shape the changes to healthcare for the 21st century.

“The course helped me to make sense of many experiences I had in the workplace by grounding theories and ideas to practice and government policy. It has had a very positive impact on my career.”

**Matthew White**
MSc graduate
MSc • PGDip • PGCert

Open to
UK • EU • International applicants

Start date
September 2018

Mode of study
Full-time: 1 year

Course Leader
Dr Priya Paudyal

Entry requirements
First or second-class undergraduate honours degree or equivalent in any public health-related subject (eg anthropology, nursing, pharmacy, psychology etc). or:
Evidence of at least three years’ work experience in an environment related to public health. Applicants must demonstrate a capacity to study at Masters level. or:
Successful completion of at least three years’ basic medical science at a UK medical school (having gained at least 360 credits) with a guaranteed place to continue medical studies on completion of the MSc.

A minimum IELTS score of 7.0 is required, with no less than 6.5 in each section and no less than 7 in writing.

Further information +44 (0) 1273 641782 • enquiries@brighton.ac.uk • bsms.ac.uk/public-health
### About this course
This established Masters programme has been running successfully for over 15 years in a strong interdisciplinary and inter-professional learning environment. The course reflects many emerging challenges in public health medicine, recent innovations in learning technology and the need for diverse methods of student assessment. The course prepares students to pursue careers related to public health in a range of national and international public and nongovernmental organisations.

### Who is it for?
The course is aimed at graduates who intend to practise in public health or related fields, and professionals who are in a position to deliver improvements in the health of communities and populations. Participants typically include public health managers, infection control nurses, intercalating medical students, screening specialists, doctors and other graduates. Students are encouraged to share their personal public health knowledge within the academic environment.

### Key areas of study
- Principles and practice of public health
- Epidemiology
- Research methods and critical appraisal
- Essential statistics in health and medical care
- Health protection
- Nutrition in public health
- Global public health

### What are the benefits?
This established Masters programme has been running successfully for over 15 years in a strong interdisciplinary and inter-professional learning environment. Teaching sessions are delivered by academicians and practitioners who are active in the field. Course participants are empowered to develop public health practice which has a positive impact on their community. The course prepares students to pursue careers related to public health in a range of national and international public and non-governmental organisations.

---

"I have enjoyed networking with other professionals from a wide variety of health backgrounds. My current job covers workplace health and I believe this professional qualification will give me the edge in gaining full-time employment in this field."

**Damian Brewer**
Access and Equalities Advisor,
Horsham District Council
Research
All MSc courses include a research-based dissertation which is supported by a series of advanced workshops. The MRes course is designed to prepare students for PhD research and independent research in clinical practice.

There are also opportunities to study for MPhil and PhD degrees at BSMS in an environment that provides postgraduate students with opportunities for interdisciplinary interactions.

Postgraduate students are usually supervised by members of BSMS, University of Brighton or University of Sussex academic staff, or by practising clinicians, providing students with a rich research experience.

Students are able to take advantage of skills training courses and use the facilities and equipment provided in both universities and in NHS research laboratories.

Find out more about our research areas and researchers at:
bsms.ac.uk/research
bsms.ac.uk/postgraduate/research-degrees
**MRes • PGCert**

**Open to**  
UK • EU • International applicants

**Start date**  
September 2018

**Mode of study**  
Full-time: 1-3 years

**Course Leader**  
Dr Trevor Welland

**Entry requirements**  
A first degree plus a stated desire to develop as a researcher.

or:

Evidence of involvement in an ongoing research programme, award of a research grant or employer support for a research project.

or:

Successful completion of at least three years’ basic medical science at a UK medical school (having gained at least 360 credits) with a guaranteed place to continue medical studies on completion of the MSc.

A minimum IELTS score of 7.0 is required.
About this course

The course has been designed to develop clinicians’ research skills and promote independent research skills in future principal investigators. Education and training is provided in quantitative and qualitative research through classroom teaching, workshops, self-directed learning and the development of research skills. Students engage with a supervised research project at an early stage and are encouraged to develop autonomy in project design, management, governance and reporting. They are also expected to give presentations and publish their research work.

Who is it for?

The MRes is aimed primarily at BSMS Academic Clinical Fellows and NHS trainees in Medicine and Surgery. Applications are also welcome from other NHS staff and others employed in a setting in which medical research is a core function of their day-to-day activity. Independently funded applicants and others who might benefit from the course may also apply. Individuals who do not wish to pursue the full MRes course may consider the PGCert with the potential to transfer to the MRes later should they wish.

Key areas of study

- Research methods and critical appraisal
- Essential statistics for health and medical research
- Evidence-based practice
- Clinical trials management
- Advanced research skills
- Epidemiology

What are the benefits?

The course is a stepping stone to PhD studies and collaborative or independent research in the future. Course graduates will be research literate, research skilled and equipped to be research active in their careers. It is expected that they will present their studies at conference presentations and in appropriate professional journals.

“...The dissertation has provided me with the opportunity to be involved in primary research from conception to dissemination. I can now appreciate the implications of primary research studies upon my patients and interpret them to guide management decisions.”

Dr Simon Glew
GP Registrar and NIHR Academic Clinical Fellow
BSMS postgraduate research covers a broad range from basic science through clinical projects to medical ethics and social science. Our overlapping research groupings and research environment provide postgraduate students with opportunities for interdisciplinary interactions.

In some projects, supervisors with a background in fundamental science are working together with clinicians to provide an exciting and productive research environment. Other projects are enhanced by the input of ethics research into research on human genetics or disease.

The neighbouring Schools of Life Sciences at the University of Sussex and Pharmacy and Biomolecular Sciences at the University of Brighton ensure a rich collaborative environment offering a wide range of seminars. Some of our students are part of larger virtual research centres of the two universities, such as Sussex Neuroscience, the Brighton Centre for Regenerative Medicine and the Brighton Musculoskeletal Research Cluster at the University of Brighton. PhD and MD students are also based at the Royal Sussex County Hospital, working on more clinical topics and supervised by clinical academics.

**Career opportunities**

A PhD at BSMS aims to develop the necessary skills to work as a researcher, applying cutting-edge technologies to subjects related to health and biomedical science. Our PhD and MD graduates have progressed into clinical academic careers, are working in biomedical science companies or continue to work in academic science.

**Specialist facilities**

BSMS’s state-of-the-art Medical Research Building on the Sussex campus provides an outstanding resource for around 50 medical research scientists. Laboratory facilities include molecular biology equipment, tissue culture labs, advanced microscopy equipment and flow cytometry.

**Faculty research interests**

- Cancer
- Cell and developmental biology
- Elderly care and stroke
- Global health
- Imaging
- Infection and immunology
- Medical education
- Medical ethics
- Digital health
- Neuroscience, psychiatry and dementia studies
- Paediatrics
- Primary care and health services
- Rheumatology

**Current PhD thesis titles**

- Developing a valid and acceptable psychosocial index of women’s sexual health risk to enable targeting of interventions in community settings
- The roles of oxidative stress and redox regulation in chronic inflammatory disease
- Neural correlates of cognitive training in middle-aged adults
- Optimising management of glioblastoma in the elderly: predicting benefit from active interventions
- Understanding late diagnosis of HIV in people age 50 and above
- Novel roles for ribonucleases in cell proliferation: understanding the role of RNA stability in control of cell proliferation

“**My PhD at BSMS allowed me to engage in top-level research and to publish four papers that helped me secure a postdoctoral position at the University of Oxford.”**

**Dr Ilaria Cervellini**

Postdoctoral Research Fellow
Our teachers

**John L Anderson**
Dissertation Co-ordinator
Clinical Specialties Lead

John Anderson is the Dissertation Co-ordinator and Lead for the Clinical Specialties programme. His main interests are research methods, public health, psychosocial aspects of health and illness and healthcare systems. He is currently involved in researching the student experience – including postgraduate student supervision and dyslexia – and health beliefs. He is a Senior Fellow of the Higher Education Academy.

**Professor Sube Banerjee**
Course Principal
Dementia Studies

Sube Banerjee is Professor of Dementia at BSMS and Director of the Centre for Dementia Studies. He was the Professor of Mental Health and Ageing at the Institute of Psychiatry, Kings College London for 10 years and led the National Dementia Strategy. He works on health systems and strategies to improve health for older adults, particularly those with dementia and in long-term care.

**Professor Kevin Davies**
Course Principal
Internal Medicine

Kevin Davies is a Consultant Rheumatologist and Head of the Department of Clinical and Experimental Medicine at BSMS. In addition he is an Associate International Director for Europe for the Royal College of Physicians and is actively engaged in developing closer links with European medicine, both clinically and academically. Kevin helped establish BSMS in 2002.

**Dr Ursula Davies**
Course Leader
Internal Medicine

Ursula Davies is a Consultant Physician and Rheumatologist at Surrey and Sussex NHS Trust and Honorary Clinical Senior Lecturer at BSMS. She is Training Programme Director in Internal Medicine for Health Education England (London and South East) and a member of the Royal College of Physicians Internal Medicine Specialty Advisory Committee. Ursula also has a Masters in Postgraduate Medical Education.

**Professor Gordon Ferns**
Head of Department
of Medical Education

Gordon Ferns is Professor of Medical Education and Metabolic Medicine at BSMS and Consultant in Clinical Biochemistry at Brighton and Sussex University Hospitals NHS Trust. He has held senior academic posts at the Universities of Surrey and Keele and has a MD and DSc from the University of London, and Fellowships of the Royal Colleges of Pathologists and Physicians of London.

**Breda Flaherty**
Course Leader
Healthcare Leadership and Commissioning

Breda Flaherty leads the MSc Healthcare Leadership and Commissioning. She is a faculty member at the NHS Leadership Academy, and a Kings Fund Leadership Associate. Breda focuses on developing leaders in changing organisations. Her BSMS ‘Clinical Commissioning’ module is rated one of the top five CCG development programmes nationally by NHS England.
Our teachers

Jackie Knight
Course Leader
Clinical Professional Studies

Jackie Knight has a combined experience of healthcare provision and academic management. She has specialised and worked in mental health and psychiatric practice and is currently working towards completing a PhD in change management. Her areas of expertise include healthcare, mental health, psychiatric practice and organisational development.

Caroline Hopper
Senior Lecturer
Healthcare Leadership and Commissioning

As an Executive Director in the NHS for over 12 years, Caroline has extensive experience in the fields of health policy, strategy and service improvement and systems change. In teaching at BSMS, Caroline is particularly interested in supporting postgraduate students to integrate their academic learning with their professional roles in order to develop themselves and their service. She also works as a consultant in health and social care.

Dr Christina Jones
Course Leader
Paediatrics and Child Health

Christina Jones is a Chartered Member of the British Psychological Society with a background in health psychology. Her current research involves developing a portfolio of studies around tailored interventions for conditions such as paediatric anxiety, depression, asthma and allergy. She has expertise in multi-method evaluations and a strong background in both randomised control trials and qualitative studies in addition to evidence synthesis by systematic review and meta-analysis.

Dr Muzaffar A Malik
Senior Lecturer
Essential Statistics

Muzaffar Malik has worked in public health for over a decade in roles with the NHS, the World Health Organisation and the medical health industry. He was a Clinical Lecturer at the University of Otago, New Zealand, and a Clinical Researcher at St Luke’s International Hospital, Japan. His areas of expertise are applied medical statistics, epidemiology and evidence-based medicine.

Dr Sarah Marshall
Course Leader
Global Pharmacy

Sarah Marshall has worked in community and hospital pharmacy, clinical trials, and academia in the Middle East, the Netherlands and the UK. Her PhD looked at developing new medicines for malaria, from plant remedies. Other interests include access to medicines and the role of pharmacy in humanitarian responses.

Professor Somnath Mukhopadhyay
Course Principal
Paediatrics and Child Health

Somnath Mukhopadhyay is Chair of Paediatrics at the Royal Alexandra Children’s Hospital. His principal interest lies in exploring new, more personalised therapeutic approaches to improve care in children with asthma and allergy, and the progress of his research has been widely reported by the national and international press.
Our teachers

Dr Sean O’Nunain
Course Leader
Cardiology

Sean O’Nunain is a Consultant Cardiologist/Electrophysiologist at the Sussex Cardiac Centre, Brighton. His specialist interests are in ablation for the treatment of supraventricular and ventricular arrhythmias and complex devices including implantable cardioverter defibrillators and cardiac resynchronisation therapy.

Dr Priya Paudyal
Course Leader
Public Health

Priya Paudyal is a Lecturer in Public Health. She has previously worked as a researcher at Peninsula Medical School and the University of Aberdeen. Her current research interests are in the field of respiratory and allergic disease, epidemiology and cancer epidemiology. She has methodological expertise in evidence synthesis and has published several systematic reviews, particularly in the areas of asthma, cancer and complementary therapies.

Professor Malcolm Reed
Course Principal, Surgical Studies
Dean, BSMS

Malcolm Reed qualified in medicine from the University of Sheffield in 1981, followed by postgraduate surgical training in the UK and a period of research at the University of Louisville in Kentucky. He was appointed as Dean of Brighton and Sussex Medical School in December 2014. His current clinical research relates to the surgical management of breast cancer, with particular emphasis on breast cancer in older women.

Dr Naji Tabet
Course Leader
Dementia Studies

Naji Tabet’s clinical and research interests and expertise are in the field of dementia. He is the Clinical Lead for the Cognitive Treatment and Research Unit at the Sussex Partnership Foundation NHS Trust, which is dedicated to advancing the treatment of Alzheimer’s disease and other dementia disorders. Dr Tabet is also researching non-pharmacological interventions for Alzheimer’s disease such as diet and exercise.

Dr Mei Trueba
Course Leader
Global Health

Since 2008, Mei Trueba’s research has focused on international development, labour relations and workers’ health. Her research interests include health risk behaviours and their determinants, socio-political and economic determinants of health, injury and disease, and the relationships between globalisation and health. Before joining BSMS, she led the MSc in International Health at the University of Leeds and action-research projects in various Latin American countries.

Ms Anouk van der Avoirt
Course Leader
Surgical Studies

Anouk van der Avoirt has always had a particular interest in teaching and training and has been the local PD for Higher Surgical Trainees for many years, and was TPD for Core Surgical Training in KSS for seven years. She is responsible for the undergraduate paediatric Surgical Curriculum at BSMS. From 2018, she will be running the Care of the Critically Ill Surgical Patient (CCrisp) course in Brighton, to which her Masters students will have priority access.
How to apply

All applications for BSMS postgraduate taught courses are managed by the University of Brighton.

**STEP 1**
Apply online for your chosen course via the ‘Apply now’ link on the BSMS course web pages.

bsms.ac.uk/postgraduate/apply-now

After submitting your application, the University of Brighton will send you an acknowledgement email. You will also receive an email inviting you to activate your University of Brighton IT user account, which will allow you to track and manage your application online.

**STEP 2**
Your application will be reviewed by an admissions panel. Shortlisted applicants are normally interviewed.

If successful you will receive an offer of a place on the course.

**STEP 3**
Once you have firmly accepted your offer you will receive further information about enrolment and induction.

**Course fees**
The fees listed below are the overall costs for full-time courses taken in the academic year 2018-2019. Where courses are taken part-time over more than one academic year, fees are usually charged pro-rata for the modules taken during each academic year. There may be a small increase in fees each year in line with inflation.
