Introduction

This module is designed to provide you with an understanding of research design with a focus on different research methodologies and methods. This module will also support the development of your critical appraisal skills and your ability to evaluate research papers. During this module, you will consider the fundamental principles that underpin different research paradigms and assess which methods are appropriate for different research questions.

As part of the assessment, you will produce a research proposal that explores an issue of interest to you. This will involve the development of an appropriate research question, the selection and justification of a particular research design to enable you to investigate your research question. This module and its assessment are practice-based to allow you to consider research that is relevant to your individual practice and professional settings and experience.

Learning Outcomes

At the end of the module you should be able to:

- Demonstrate a critical understanding and evaluation of major research designs and their relative strengths and applications;
- Systematically develop and justify a chosen research approach and methodology to investigate a specific topic within your subject;
- Produce a research proposal which demonstrates appreciation of scientific methods appropriate to your specialist area;
- Critically appraise a variety of research papers across a range of study designs;
- Carry out an appropriate, rigorous review of the literature;
- Be aware of ethical and governance issues in research.

Content

This module covers a range of research paradigms and methods including:

- Ontology, Epistemology and Methodology
- Overview of research methods
- Quantitative research methodology, study design and data analysis
- Qualitative research methodology, study design and data analysis
- Populations and sampling
- Primary and secondary data
- Developing a research question
- Literature search strategy
- Critical appraisal of research literature
- Research ethics and governance
- Obtaining informed consent
- Introduction to statistics and hypothesis testing
- Developing a research proposal.
Reading List

The reading list below contains a range of core readings and recommended journals. There are also topic and session specific readings provided further down in this Handbook. This is also available as a digital reading list for MDM10 in My Studies and accessed via the course menu within your specific MDM10 module. The digital reading list provides access to online content and shows availability of print books at your libraries.

Digital reading list:

Core reading list

Module Structure and Timetable

Module: MDM10 Research Methods and Critical Appraisal  
Dates: Monday 4th – Friday 8th April 2022  
Venue: N/A – module delivered remotely

The module will be delivered through a combination of live, online lectures, pre-recorded sessions and online discussions and activities. Each day or half day is dedicated to a particular subject and a small number of tutors available to provide academic support on these subjects.

Live, online lectures will take place on Microsoft Teams, which you will need to download. Instructions on how to download Teams can be found here: https://blogs.brighton.ac.uk/teachingcontingency/microsoft-teams/how-to-access-and-install-teams/

You will be added to a group on Microsoft Teams for the live teaching sessions, which you will be able to find here:  
https://teams.microsoft.com/l/team/19%3a1XwUEpQim0dC4eqgronAoDkbpD6vGQPHm5a3wh1SB8g1%40th read.tacv2/conversations?groupId=ba430513-7b1c-4c0f-ad19-fe339dcb77fe&tenantid=a900bb90-94fe-4658-8b34-dd72084c5064

The schedule for the five days of the module is as follows:

<table>

Introduction and Overview of the Research Design Process and Research Methods

This session will provide an introduction to the wide range of research methods available to us in the health field. You will learn about the differences between **Quantitative** and **Qualitative** methods and the underpinning theoretical assumptions behind them. It will discuss different views about what constitutes “reality” (ontology), “knowledge” (Epistemology) and how these relate to different approaches in research (Methodology). It will introduce you to some of the main methods adopted in both approaches and provide examples of these in practice. The accessibility of different methods will be emphasised!

References:

- Cleland S, Durning SJ. Researching Medical Education: Wiley Blackwell; 2015

Working with the Literature

A BSMS librarian will teach search strategies to find and access relevant quality information within medical databases.

References:

Survey Methodology

This session will consider the logic and practice of cross-sectional studies from small-scale, local studies to large-scale national surveys. It will include different methods of sampling from different populations; the use of self-administered questionnaires (SAQ) and interviewer-administered questionnaires; and different approaches to interviewing. It will enable you to critically evaluate existing questionnaires and to consider how you might design a survey of
your own in the future.

References:

- Polgar & Thomas (op cit) pp 66, 97 – 114
- Polit & Beck (op cit) pp 241, 294 – 303, 323 – 331

**Case Control Studies, Cohort Studies and Experiments**
This session will introduce you to the theory and practice of conducting a (retrospective) case control study and a (prospective) cohort study. It will also provide an overview of the different types of experiences used in research from laboratory based experiments to applied field based research.

**Randomised Controlled Trials**
The session will focus on Randomised Controlled Trials (RCTs). You will identify key factors in the design and analysis of RCTs through an exploration of ethics, bias and randomisation.

References:

**Qualitative Research: Introduction and Methods**
The session will provide an introduction to qualitative research design and the essential elements for consideration when selecting appropriate methods of qualitative data collection.

References:

‘Research as talk’: Interviews and Focus Groups

References:

- Cane, R et al (2001) ‘Understanding Childhood Asthma in Focus Groups: Perspectives from Mothers of Different Ethnic Backgrounds’ *BMC Family Practice*

Qualitative Research: Observation & Ethnography

This session will focus on the theory and practice of Ethnographic approaches and Phenomenology. The different methods used – such as participant observation – will be covered.

References:

Qualitative Research: Visual and other Methods

In this session we will explore the ways in which visual and other methods have been and can be used to gather qualitative data and how these approaches can be used to challenge the ‘power hierarchy’ that can seem inevitable between researcher and research participants. Visual and other approaches can also be used to challenge the mimetic dimension of research and place emphases on the multiple meanings and ways of ‘reading’ research data and presentations.

References:

**Qualitative Research: Data Analysis**

This session will introduce you to the basic principles of qualitative data analysis. The session is intended to be highly interactive, offering opportunity to subject theoretical ideas to experiential application.

 References:

**Policy Analysis**

References:

A Case Study Approach

References:

Introduction to Statistics

These sessions will introduce the rationale behind hypothesis generation and testing. You will look at what is and what is not a testable hypothesis, consider different levels of measurement and be introduced to some of the most common statistical tests. You should learn what is meant by “significance”, “p – values”, “confidence intervals” and the differences between descriptive and influential statistics. You will also be introduced to SPSS.

References:
- Weaver A & Goldberg S (2011) Clinical Biostatistics made ridiculously simple (Miami, Med Master Inc.)

Systematic Reviews

This session covers the basic principles of systematic reviews, their importance in research and how to interpret such articles. It will also consider database search strategies and the importance of searching the ‘grey literature’.

References:
- Other resources are available at: http://cebmh.com/
Ethical Issues and Research Governance

This session will focus on ethical issues that need to be addressed in research and the process of gaining informed consent. It will consider some of the basic human rights in relation to research and, in particular, look at issues relating to informed consent in research. It will also consider the use of participant information sheets and some of the ways in which informed consent may be compromised, for example, by limitations set on confidentiality and participants’ lack of understanding.

- Oliver, Paul (2010) *The student's guide to research ethics* 2nd ed. Maidenhead, OUP
- NHS Health Research Authority (2017) UK policy framework for health and social care research.
- Good Clinical Practice: www.mhra.gov.uk/Howweregulate/Medicines/Inspectionandstandards/GoodClinicalPractice

Learning and Teaching Strategies

Teaching methods will encompass:
- Presentations / Lectures
- Group work
- Debate and Discussion
- Personal reflection
- Workshop

In addition to the main teaching sessions, there is a workshop on *Obtaining Informed Consent*, which entitles participants to a Certificate of Attendance. Learning will be supported further by the use of prepared notes, selected reading and visual aids. Course materials will be made available on ‘My Studies’ where appropriate: http://studentcentral.brighton.ac.uk

Literature Searching

You will be expected to develop your searching skills to ensure all relevant literature for your assignment is accessed. You should establish a database of current theoretical and empirical articles and texts to draw on to complete your assignments.
Study and Academic Writing Skills

Some of you will have recently submitted academic essays and will be ready to do so again. Others may not be in this position and the following offer guidance to either review or prepare for your study techniques on this module.

- Northledge A. *The good study guide*. 2nd ed. OU Press; 2005
- Powell S. *Returning to study – a guide for professionals*. Buckingham: OU Press; 1999
- Trzeciak J, Harlow SE. *Study skills for academic writing: student’s handbook*. Melbourne: Longman; 2000

In addition, there is support available to you to help you work on your study skills and essay writing within the Universities of Brighton and Sussex. In particular, you can access the two Royal Literary Fund Fellows or online support from the University of Sussex’s Skills Hub:

Better writing with the RLF
Two Royal Literary Fund (RFL) Fellows are available to help students improve their writing skills. One to one sessions can be booked via the Study Direct page:
For more information visit [www.sussex.ac.uk/library/guides/rlf](http://www.sussex.ac.uk/library/guides/rlf)

Alternatively, students can visit the Royal Literary Fund website where there is lots of useful information on essay writing: [http://www.rlf.org.uk/resources/writing-essays/](http://www.rlf.org.uk/resources/writing-essays/)

Academic skills for students at University of Sussex
For practical help on academic English language skills, reading, research and study techniques. To find out more and book a place for workshops, tutorials and events click link below: [http://www.sussex.ac.uk/skillshub/](http://www.sussex.ac.uk/skillshub/)
BSMS students have access to the University of Sussex Library as well as the University of Brighton Falmer Library, where key textbooks for the course will be held - here is the BSMS Library Link. You will be registered to use the Universities’ computing facilities and receive a library card. A username and password will provide you with access to online resources to the University of Brighton – My Studies. To access Sussex Library online resources and certain reading list items follow instructions here.

BSMS librarians offer training on finding and retrieving information, literature searching, online referencing, and can purchase books for your specific research area where possible. For further information please see the library induction video. Please contact us via the email below if you have any issues with accessing online library resources. To make an appointment or for general enquiries, email BSMS Librarians, Steve Bowman and Annemarie Frank on: bsmslibrary@bsms.ac.uk

The BSMS library catalogue SABRE can be accessed via My Studies. See also Online Resources which link to databases and authoritative websites in the fields of medicine, pharmacy, nursing and other subject areas.

Module Assignment – A 3,000 word Research Proposal
Submission Deadline: Tuesday 31st May 2022 by 4:30pm
Tuesday 6th September by 4:30pm (Assessment deadline changed)

The assignment requires you to write a 3,000 word research proposal. The aim of the assignment is to demonstrate your knowledge and understanding of research design.

The assessment will comprise a research proposal of a selected issue of interest to you. You will need to describe and justify an appropriate research design (research question, sampling, methodology, methods, data analysis, an ethical framework and issues) in order to investigate your research question. Evidence of evaluation of a range of research methodologies and methods must be demonstrated and incorporated into this assignment.

You are also expected to demonstrate critical appraisal skills. These are particularly evident when discussing the literature which informs your research question and evaluating a range of research methodologies and methods.

The word count is up to 3,000 words.

Tables and figures are not included in the main word count, but should have a maximum of 500 words in total and words beyond this limit will not be marked.
Referencing, bibliography and appendices are not included in the word count.

You must show your word count on the front cover.

You have the option to submit a draft of 1,000 words of your assignment. This will provide the opportunity for feedback. NB – these may not be looked at in the two weeks before submission.

In addition, you need to include in the appendices:

1. A 500 word Reflective Account of the extent to which the knowledge you have obtained within the module has influenced or affected aspects of your practice or professional context.
2. If your research area is in clinical trials, it is suggested that you attach a Certificate of Completion of NIHR GCP course: https://www.nihr.ac.uk/our-faculty/clinical-research-staff/learning-and-development/national-directory/good-clinical-practice/our-courses/introduction.htm

Guidelines and suggested structure for writing your assignment

a) Introduction
State the background to the area of study and why this is important. Say why you are interested in the topic – your rationale. State the purpose of your study and be clear what your research question is.

b) Review of indicative literature
Show how you searched the literature. You may include the whole search strategy in your Appendix, but you should discuss some details within the text. List the electronic databases you used and include after each one the years of the search, for example: Medline (1966 – September 2006); Cochrane (Version 2). Include a list of key terms that you used.

Select two articles to critique in depth. Select a critical appraisal tool to support this e.g. CASP. Remember to focus on the research design of the papers you select.

c) Research Design
It is important that you make extensive reference to the research methods literature in this section.

Your research design should describe, justify and evaluate:

a. Research question
b. Sampling – of both site(s) and participants. For a systematic review, this section will focus on inclusion and exclusion criteria for the literature reviewed.
c. Methodological approach and methods of data collection
d. How you intend to analyse the data
Any ethical issues that might arise in the proposed research and any ethical framework or approach to governance you might use e.g. will the proposed research require ethical approvals?

In this assignment you will need to demonstrate evidence of your evaluation of a range of methodological approaches / methods, not just the one you choose for your proposed research area.

**Qualitative**
Show that you understand the main approaches. Justify the approach you have chosen and those which you have discounted. The main methodological approaches include e.g. ethnography, case studies, action research. Qualitative methods include interviews (incl focus groups); observation, documentary analysis.

**Quantitative**
Show that you understand the main methodological approaches (Surveys, experimental / quasi-experimental designs, RCTs) and justify the design you choose and why you have discounted others. Methods include questionnaires, structured interviews, and systematic observation.

**Systematic Reviews**
Give your reasons for doing a systematic review and evaluate this as a methodological approach. Refer to the literature on how to conduct a systematic review.

d) References
All the references used in the text must be listed here. Be careful that you don’t forget any. It is worth going through the assignment and just checking that nothing has been lost. Students sometimes include web site addresses in the text; include these in the reference list.

e) Appendices
e.g. Full details of your literature search may be included in an Appendix.

Assignment exemplars: there are some examples of good practice to look at on My Studies.
### Marking Criteria

The following schema is an indicative framework for the assessment of assignments. Course participants will be given a percentage mark, but the Division places great emphasis on individual written feedback, often supplemented by face-to-face discussion of the work with the course tutor. Assignments are internally moderated and a sample sent to the external examiner for quality assurance purposes.

**PLEASE NOTE THE PASS MARK FOR ALL MODULES IS 50%**

<table>
<thead>
<tr>

**Presentation of Assignments**

**General**
All assignments should

- Have a title page stating the module name and code, title of assignment and word count (to enable anonymous marking, please do not include your name or student number).
- Be typed, double spaced in black print no smaller than point 10.
- Have margins of 3cm on each side of the page.
- Be submitted as one single document including the 500 word reflection as an appendix.

**References**
Vancouver is our adopted style of referencing. This system is the one most commonly used in other medical schools and medical journals. Vancouver offers simplicity, sympathy to the flow of language and facilitates accurate word counts which do not include citations.

Harvard can be used if preferred and students will not be penalised for doing so, providing referencing is accurate, comprehensive and consistent.

To facilitate efficient and accurate referencing, the bibliographic software Endnote Web is provided on University of Brighton PCs for students and staff. This allows the creation of bibliographies in Microsoft Word, the searching of bibliographic databases and the organisation of references in a searchable database. For guidance on Vancouver see the [BSMS Vancouver Style of Referencing Handout](#) available in Library **Resources on Referencing and Endnotes on My Studies**. Contact [bsmslibrary@bsms.ac.uk](mailto:bsmslibrary@bsms.ac.uk) if assistance with setting up EndNote Web is required.

**Appendices**
Appendices may be submitted with the work to support or give detailed illustration of a particular model or framework e.g. approach to searching the literature.

**Module Regulations**

**Cancellation of Module**
The University reserves the right to cancel modules for any reason it deems sufficient and to alter programmes without notice. In the event of such cancellations, the full fee will normally be refunded.

**Attendance**

*It is expected that students will attend 100% of the module.* In the event that you are not able to attend for all or part of a module day please contact the Module Administrator in advance explaining the reason for your absence. Please note that you are required to attend for a minimum of 80% of the taught module sessions. If you are unable to meet this requirement you will not be able to take the assessment.
If you need to cancel your place on this module please contact the Module Administrator. **Failure to inform the university that you are unable to attend the module prior to the first day of the module will result in a ‘fail’ for the module and you may incur a charge.**

**Anonymous Marking**
This module assessment will be marked anonymously in line with University regulations. To ensure the robustness of this process, please do not include your name or student number anywhere in the document (including the file name). You should save your work with the title MDM10D. Turnitin identifies your submission with a submission ID (not by name or student number).

**Submission of Assignments**

**Final Submission Deadline: Tuesday 6th September 2022 - by 4:30pm (16:30)**

Please submit your assignment *electronically* to the Turnitin Assignment link on My Studies by the above deadline. The electronic submission box is closed at the above mentioned time. It is **strongly recommended that you submit your document a few days prior to the deadline** in order to avoid any last minute problems. Please submit just one document and make sure you read and follow the submission instructions contained in **Appendix 1 – Submission Instructions** at the end of this handbook.

Please note: hard copies and submissions via email will not be accepted.

**Late Submission and Extensions**

**Late Submissions**
Work submitted within 2 weeks of the deadline for submission (**Late Submissions**) may be accepted for the consideration of the Area Examination Board, with the Course Leader’s approval. Late work may be marked and feedback provided to the student, however you should contact the Course Administrator as soon as you can in these circumstances. Unapproved submissions will be capped at the minimum pass mark of 50%. If the work is submitted more than 2 weeks after the deadline for submission, it will not be accepted, and will be considered a non-submission, and a ‘fail’ result will be recorded for the component.

**Please note that if you have previously failed or have been referred in a module you are not permitted to submit late.**

**Extensions** to submission dates are only given in exceptional circumstances where evidence is provided. Your extension form must be signed by your course leader and can be granted for a maximum period of one week. If you wish to apply for an extension to the submission of assignment dates, you should contact Ian Angell – I.Angell@bsms.ac.uk to obtain the relevant forms and consult the Graduate Handbook for guidance on the procedure.

A submission box for agreed extensions and late work will be available for a period of one to two
weeks respectively after the final deadline.

**Results and Examination Board**

You should be able to access online feedback and **provisional results** (subject to external examination) on Tuesday 4th October 2022 via My Studies. **Please note that marks at this stage are provisional and may be subject to change following external moderation.** You will receive email notification regarding your agreed results after all results are ratified at the Examination Board on Thursday 27th October 2022. Details of how to access your grade and feedback can be found in **Appendix 1**.

Full details of the BSMS Postgraduate Taught Examination and Assessment Regulations (PGTEAR) can be found on My Studies in the BSMS Postgraduate Medicine area under ‘Policy and Regulations’.

If you receive a ‘fail’ result and are permitted to repeat the module (for which you will incur a charge with attendance) your result for this repeat will be capped at 50%.

**Plagiarism**

**BSMS takes plagiarism extremely seriously.** It is a matter of academic integrity and probity. Plagiarism is the act of taking the work or ideas from another and passing it off as your own.

Work that you submit must be free from any form of plagiarism. This includes taking passages directly from a journal, book or the internet, copying work from another student on your course, another student who studied the module previously, or another person studying elsewhere or ghost writing.

Plagiarism can also come in the form of **self-plagiarism** if you use your own old essays, reports of publications when writing a new one without referencing them properly. If you are using any of your previous work when writing an assignment you should reference it with the same level of care that you would any other source.

For those students registered with a professional regulatory body (or seeking to be in the future), such as the General Medical Council or Nursing and Midwifery Council, academic plagiarism can have significant professional consequences with regulatory bodies taking a very keen interest in cases where, for example, a doctor’s probity is called in to question.

Further information about plagiarism and academic misconduct, and related penalties can be found in the BSMS Postgraduate Taught Examination and Assessment Regulations (PGTEAR).

Additional resources on plagiarism including resources on avoiding plagiarism can be found on both the Universities of Brighton and Sussex’s websites: [https://blogs.brighton.ac.uk/ask/avoiding-plagiarism/](https://blogs.brighton.ac.uk/ask/avoiding-plagiarism/) [http://www.sussex.ac.uk/skillshub/?id=386](http://www.sussex.ac.uk/skillshub/?id=386)
The University of Brighton is registered with the JISC Plagiarism Detection Service (TurnitinUK). The Service complies with UK Data Protection Law.

BSMS reserves the right to use the TurnitinUK Plagiarism Detection Service and students’ work submitted for assessment purposes will automatically be submitted to the Service for checking.

You will be able to view your Originality report prior to the final deadline for submission (see Appendix 1).

By clicking submit, a student declares their understanding that:
A) the work is original, of their own construction and not plagiarised from other sources;
B) anonymity has been maintained by using a pseudonym for any patient/client referred to and have not named Trusts or clinical areas, and;
C) Failure to comply with above declaration may result in a referral or fail.

Appendix I - Submission Instructions

About Turnitin

Turnitin is a Web-based service that can find and highlight matching or unoriginal text in a written assignment. Turnitin checks any papers submitted against its database of materials to look for matches or near matches in strings of text. Turnitin then generates an Originality Report. The Originality Report summarises and highlights matching text.

Assignment Submission using Turnitin

Before you submit your assignment.....

- Don’t forget it’s always a good idea to keep a backup copy of all your work, whether you’re submitting online or not.
- The front cover of your document must include: module code and title, assignment title and word count, please do not include your name or student number.
- Please name your file MDM10D, Turnitin will recognise that the assignment belongs to you but to ensure anonymity the marker will not see any identifying information so please do not include your name/student number in the file name or the assignment itself.
- Turnitin accepts the following file types: PDF, Microsoft Word, WordPerfect, HTML, RTF, Open Office (ODT), Google Docs and plain text. Zip (compressed) files are not acceptable.
- Your file should not be larger than 40MB.
- Turnitin will not accept submission of multiple files; please submit just one file. Any additional documents should be included as an appendix within your main file.
- To avoid any last-minute technical problems with submission, we strongly advise you to submit your assignment well before the deadline.
• You can submit your assignment multiple times up to the deadline. Your final submission before the deadline will be the one which is counted. We recommend that you take advantage of this to avoid any problems with last-minute submission!

• If you do have technical problems with submitting your assignment, try:
  o Submitting in a different file format – we recommend PDF if you have problems with a different file type.
  o Using a different internet browser – we recommend Firefox. In particular, students have in the past experienced problems with submitting using Safari.

• If neither of these solves the problem, please contact the University of Brighton IT Service Desk (servicedesk@brighton.ac.uk / 01273 64 4444) or the Programme Administrator.

Declaration
By clicking submit, you confirm that you have read, understood and agreed the following declaration:

a) the work is original, of your own construction and not plagiarised from other sources;

b) anonymity has been maintained by using a pseudonym for any patient/client referred to and have not named Trusts or clinical areas, and;

c) failure to comply with above declaration may result in a referral or fail.

Turnitin Submission Guide
For an up to date guide on how to use Turnitin please view the following webpage with instructional videos:
