

Volunteers Needed for Research Study on Behavioural Responses!

Interested in learning how your personality and heart rate influence behaviour responses? We want to hear from you!

We are conducting a study to find out if personal characteristics influence behaviours during conflict.

What do I have to do?

You will complete a 45-minute online questionnaire, then attend a 1.5-hour in-person session at Falmer that involves a smart wearable vest to monitor your heart and breathing.

Who can join?

- Adults aged 18-60 years.
- No history of cardiovascular conditions.
- Currently or recently (in the last 6 months) employed in public-facing roles involving regular interaction with the public (e.g., customer service, healthcare, education).

All participants will receive a £20 Amazon voucher!
