

# MenoBrain: HOW DOES MENOPAUSE AFFECT THE BRAIN?

Join our brain research study!

**We are conducting an exciting study  
investigating how the brain may change during the  
menopausal transition!**

## WHO CAN TAKE PART?

- ✓ Women aged 35–60
- ✓ in **PREMENOPAUSE** (regular menstrual cycle) or experiencing symptoms of **PERIMENOPAUSE** (e.g., irregular periods, hot flashes, sleep changes))
- ✓ Interested in contributing to brain research

## WHY PARTICIPATE?

- Contribute to important women's health research
- Help advance understanding of inflammation-related processes that may occur in the brain during the menopausal transition

## WHAT TO EXPECT?

- Set of online Questionnaires
- One hour of MRI brain scan
